DURANGO

Ancient DURANGO STONE™ GOLDEN TONE COLLECTION *TRULY TUMBLED™ FINISH*

The quarry is yielding a beautiful array of golden tones that we are offering in a *Truly Tumbled™* finish. The amber warm tones of this material, with hints of rose, gold, peach and pewter, create a soothing and inviting feeling. The color tone starts lighter and gradually becomes darker with more prominent movement in each piece. The acceptable color range for the stone can display the color characteristics of both selections shown.

The tumbling process mutes the bright tone of the colors. The material can be color enhanced to bring out the stone's vibrant coloration or a sealer can be used to maintain the muted display. Either way, this stunning material is what clients demand to create a unique and individualistic installation that is guaranteed to make a statement.

Durango Ancient Zacatecas Peach™
Truly Tumbled™ Finish

The characteristics of sunset reds, rusts, hints of terra cotta, light gold's with traces of blush, all accompanied by bold peach tonalities are unparalleled in both color and shade variations in our ***Durango Ancient Zacatecas Peach™***.

The tumbling process mutes the bright tone of the colors. The material can be color enhanced to bring out the stone's vibrant coloration or a sealer can be used to maintain the muted display. This material will fire up any installation with the sizzle of the southwestern color palettes, or it can create a dynamic enhancement to traditional and eclectic architecture and design. ***Durango Ancient Zacatecas Peach™*** is available in modular tile sizes, slabs, mosaic meshmounts, decorative trim pieces and custom items.
